

1. What is the primary function of the CPU in a computer?

1 / 1 point

- ☐ To display images on the screen
- ☒ To perform arithmetic and logical operations on data
- ☐ To store data permanently
- ☐ To connect to the internet

👏 Nice work

Correct! The CPU is responsible for performing arithmetic and logical operations as part of processing instructions.

2. What best describes programming as a process?

1 / 1 point

- ☐ A physical activity involving hardware manipulation
- ☐ A language only understood by humans
- ☐ A random set of commands given to a computer
- ☒ A sequence of instructions executed by a computer

👏 Nice work

Correct! Programming involves writing sequences of instructions that a computer can execute.

3. What was one of the original philosophies behind the creation of Python?

1 / 1 point

- ☐ To replace all other programming languages
- ☐ To exclusively support web development
- ☐ To create the fastest executing code possible
- ☒ To emphasize code readability and simplicity

👏 Nice work

Correct! Python was designed with readability and simplicity to make programming more accessible.
