

1.

When Python is running in the interactive mode and displaying the chevron prompt (>>>) - what question is Python asking you?

1 / 1 point
- Select the correct option.

☐ What is your favourite color?

☒ What Python statement would you like me to run?

☐ What is the next machine language instruction to run?

☐ What Python script would you like me to run?

✔ Nice work

Correct! The chevron prompt (>>>) indicates that Python is ready to take and execute any Python statement you enter.
2.

What will the following program print out:

1 / 1 point
- ```
1 >>> x = 15
2 >>> x = x + 5
3 >>> print(x)
```

Select the correct option.

☒ 20

☐ 5

☐ 15

☐ "print x"

✔ Nice work

Correct! The program initializes **x** to 15, then adds 5 to **x**, resulting in 20, which is printed.
3.

What is the file extension for Python scripts (files)?

1 / 1 point
- Select the correct option.

☐ .png

☒ .py

☐ .exe

☐ .doc

✔ Nice work

Correct! Python script files have the **.py** extension, which indicates they are Python programs.
4.

Which of these are reserved words in Python ?

1 / 1 point
- Select all that apply.

☐ concat

☒ break

✔ Nice work

Correct! **break** is a reserved word in Python used to exit loops.

☒ if

✔ Nice work

Correct! **if** is a reserved word in Python used for conditional statements.

☐ todo

5.

What is the proper way to say “good-bye” to Python?

1 / 1 point

Select the correct option.

☐ #EXIT

☐ while

☐ // stop

☒ quit()

✔ Nice work

Correct! The **quit()** function is used to exit the Python interpreter.

6.

Which part of a computer executes the program instructions?

1 / 1 point

Select the correct option.

☐ Input/Output Devices

☒ Central Processing Unit

☐ Secondary Memory

☐ Main Memory

✔ Nice work

Correct! The Central Processing Unit (CPU) is responsible for executing program instructions.

7.

What is "code" in the context of this course?

1 / 1 point

Select the correct option.

☒ A sequence of instructions in a programming language

☐ A way to encrypt data during World War II

☐ A password we use to unlock Python features

☐ A set of rules that govern the style of programs

✔ Nice work

Correct! In programming, "code" refers to a sequence of instructions written in a programming language.

8.

A USB memory stick is an example of which of the following components of computer architecture?

1 / 1 point

Select the correct option.

☒ Secondary Memory

☐ Main Memory

☐ Central Processing Unit

☐ Output Device

✔ Nice work

Correct! A USB memory stick is considered secondary memory used for storing data.

9.

What is the best way to think about a "Syntax Error" while programming?

1 / 1 point

Select the correct option.

☐ The computer has used GPS to find your location and hates everyone from your town

☐ The computer needs to have its software upgraded

☐ The computer is overheating and just wants you to stop to let it cool down

☒ The computer did not understand the statement that you entered

✔ Nice work

Correct! A "Syntax Error" occurs when the computer cannot interpret the code due to incorrect syntax.

10.

Which of the following is not one of the programming patterns covered in Chapter 1?

1 / 1 point

Select the correct option.

☐ Repeated Steps

☐ Conditional Steps

☐ Sequential Steps

☒ Random steps

✔ Nice work

Correct! "Random steps" is not a programming pattern covered in Chapter 1.
