

1. Which of the following regular expressions would extract 'uct.ac.za' from this string using re.findall?

1 / 1 point

```
1 From stephen.marquard@uct.ac.za Sat Jan 5 09:14:16 2008
```

Nice work

2. What will the '\$' regular expression match?

1 / 1 point

Nice work

3. What would the following mean in a regular expression? [a-z0-9]

1 / 1 point

Nice work

4. What is the type of the return value of the re.findall() method?

1 / 1 point

Nice work

5. What is the "wild card" character in a regular expression (i.e., the character that matches any character)?

1 / 1 point

Nice work

6. What is the difference between the "+" and "*" character in regular expressions?

1 / 1 point

Nice work

7. What does the "[0-9]+" match in a regular expression?

1 / 1 point

Nice work

8. What does the following Python sequence print out?

1 / 1 point

```
1 x = 'From: Using the : character'
2 y = re.findall('^F.+:', x)
3 print(y)
```

Nice work

9. What character do you add to the "+" or "*" to indicate that the match is to be done in a non-greedy manner?

1 / 1 point

Nice work

10. Given the following line of text:

1 / 1 point

```
1 From stephen.marquard@uct.ac.za Sat Jan 5 09:14:16 2008
```

What would the regular expression '\$+?@\S+' match?

Nice work
