

1. Who is credited with the REST approach to web services? 1 point

- ☐ Bjarne Stroustrup
- ☐ Leonard Klienrock
- ☐ Vint Cerf
- ☒ Roy Fielding
- ☐ Daphne Koller

2. What Python library do you have to import to parse and handle JSON? 1 point

- ☒ import json
- ☐ BeautifulSoup
- ☐ ElementTree
- ☐ import re

3. What is the method used to parse a string containing JSON data so that you can work with the data in Python? 1 point

- ☐ json.read()
- ☐ json.connect()
- ☒ json.loads()
- ☐ json.parse()

4. What kind of variable will you get in Python when the following JSON is parsed: 1 point

```
1  [ "Glenn", "Sally", "Jen" ]
```

- ☒ A list with three items
- ☐ A dictionary with three key / value pairs
- ☐ A dictionary with one key / value pair
- ☐ Three tuples
- ☐ One Tuple

5. Which of the following is *not* true about the service-oriented approach? 1 point

- ☐ Web services and APIs are used to transfer data between applications
- ☒ An application runs together all in one place
- ☐ An application makes use of the services provided by other applications
- ☐ Standards are developed where many pairs of applications must work together

6. If the following JSON were parsed and put into the variable x, 1 point

```
1  {
2      "users": [
3          {
4              "status": {
5                  "text": "@jazzychad I just bought one ._.",
6              },
7              "location": "San Francisco, California",
8              "screen_name": "leahculver",
9              "name": "Leah Culver",
10          },
11      ...
12  }
```

what Python code would extract "Leah Culver" from the JSON?

- ☐ x["name"]
- ☒ x["users"][0]["name"]
- ☐ x["users"]["name"]
- ☐ x->name
- ☐ x[0]["name"]

7. What library call do you make to append properly encoded parameters to the end of a URL like the following: 1 point

```
1  http://maps.googleapis.com/maps/api/geocode/json?sensor=false&address=Ann+Arbor%2C+MI
```

- ☐ re.match()
- ☐ urllib.urlcat()
- ☒ urllib.parse.urlencode()
- ☐ re.encode()

8. What is one advantage of a Service Oriented Architecture? 1 point

- ☐ Standalone applications start more quickly
- ☒ An application can be developed that makes use of data provided by other organizations
- ☐ When one part of an application is updated, all parts of the application must also be updated

9. When accessing API end points, what is OAuth typically used for? 1 point

- ☐ Making sure that data is retrieved using the most efficient encoding
- ☐ Selecting between data returned as XML or JSON
- ☒ Providing security credentials to access the API
- ☐ Making sure that only the openly authorized data is returned for the API response

10. What Python package is used to parse XML? 1 point

- ☐ DOMDocument
- ☒ xml.etree.ElementTree
- ☐ xml.bind.JAXBContext
- ☐ System.Xml.Linq
