

1. Who is credited with the REST approach to web services?

1 / 1 point

Nice work

2. What Python library do you have to import to parse and handle JSON?

1 / 1 point

Nice work

3. What is the method used to parse a string containing JSON data so that you can work with the data in Python?

1 / 1 point

Nice work

4. What kind of variable will you get in Python when the following JSON is parsed:

1 / 1 point

```
1 [{"Glenn", "Sally", "Jen"}]
```

Nice work

5. Which of the following is *not* true about the service-oriented approach?

1 / 1 point

Nice work

6. If the following JSON were parsed and put into the variable x,

1 / 1 point

```
1 {
2   "users": [
3     {
4       "status": {
5         "text": "@jazzychad I just bought one __.",
6       },
7       "location": "San Francisco, California",
8       "screen_name": "leahculver",
9       "name": "Leah Culver",
10     },
11     ...
12   ]
13 }
```

what Python code would extract "Leah Culver" from the JSON?

Nice work

7. What library call do you make to append properly encoded parameters to the end of a URL like the following:

1 / 1 point

```
1 http://maps.googleapis.com/maps/api/geocode/json?sensor=false&address=Ann+Arbor%2C+MI
```

Nice work

8. What is one advantage of a Service Oriented Architecture?

1 / 1 point

Nice work

9. When accessing API end points, what is OAuth typically used for?

1 / 1 point

Nice work

10. What Python package is used to parse XML?

1 / 1 point

Nice work
